

SN 10/058,491- Amendment to Claims -  
Amendment, 37 C.F.R. §1.116

What is claimed is:

Claim 1 is canceled.

2(currently amended). Shower head according to claim 11 ~~4~~, wherein both groups of jet outlets are connected to in each case one chamber in the housing.

3(currently amended). Shower head according to claim 11 ~~4~~, wherein the switching device opens or closes the water inlet into the chamber associated with the jet outlets.

4(currently amended). Shower head according to claim 11 ~~4~~, wherein aeration takes place within the housing.

5(currently amended). Shower head according to claim 11 ~~4~~, wherein the air is sucked through an opening in the jet discharge disk.

6(previously presented). Shower head according to claim 5, wherein a tubular projection extends into the chamber from the opening in the jet discharge disk.

7(currently amended). Shower head according to claim 11 ~~4~~, wherein the first group of jet outlets is arranged radially within the arrangement of jet outlets of the second group of jet outlets.

8(currently amended). Shower head according to claim 11 ~~4~~, wherein the switching device is manually operated.

9(currently amended). Shower head according to claim 11 ~~4~~, wherein the switching device is automatically reset.

10(previously presented). Shower head according to claim 2, wherein a seal between the chambers is at least partly formed by the jet disk, including a lining of said jet disk made from elastomeric material.

SN 10/058,491- Amendment to Claims -  
Amendment, 37 C.F.R. §1.116

11(previously presented). Shower head having a housing, a jet disk terminating the housing, at least two groups of jet outlets whereof one group is continuously in operation and delivers an aerated jet, and a second group of the jet outlets can be switched in by a switching device, wherein a ratio of through-flows between the second group of jet outlets and the first, continuously operating group of jet outlets is higher than 2:1.

12(currently amended). Shower head according to claim 11 ~~4~~, wherein the jet disk and housing are radially and axially mutually fixed.

13(currently amended). Shower head according to claim 11 ~~4~~, wherein the switching device is positioned between the jet disk and the housing.

14(currently amended). Shower head according to claim 11 ~~4~~, having markings for indicating the position of the switching device.
